

## **1 Postdoc position Attosecond coincidence spectroscopy in molecules.**

**A Postdoc position** is available in the field of attosecond spectroscopy at the Albert-Ludwigs-University of Freiburg in Germany.

The project focuses on the implementation of time-resolved spectroscopy for the study of attosecond electronic dynamics in atoms and molecules.

The attosecond group at the University of Freiburg has extensive experience in the investigation of electronic dynamics in small molecular systems (H. Ahmadi et al. Nature Communications 13, 1242 (2022); D. Ertel et al. Science Advances 9, eadh7747 (2023)).

The position requires a strong background in optical, atomic and molecular physics.

The position will start on 01.01.2025 and will last for one year, with the possibility of a one-year extension after a positive review.

Applications should include a CV, a letter of motivation and a list of publications. The applications should be addressed to:

Prof. Dr. Giuseppe Sansone
